PROFILE

Full-Stack Software Developer with 3+ years of experience specialising in Laravel and modern web technologies. Delivered enterprise-grade CRM, ERP, RMS, and B2B platforms for UMS (United Media Services) via Clicks Egypt, and for Cyrus Technology. Simultaneously served international freelance clients across Australia, the US, Algeria, and Saudi Arabia. Proficient in PHP, Java, Node.js, React, and React Native, with strong hands-on experience in cloud services (Google Cloud, Azure, AWS), Linux, and server management.

TECHNICAL SKILLS

Backend	PHP (Laravel – advanced), Java (Spring), Node.js (Express.js), RESTful & GraphQL APIs, Microservices
Frontend	React, React Native, Electron, Tailwind CSS, Responsive UI/UX, Third-party API integration
Databases	MySQL, PostgreSQL, MongoDB, Redis — design, optimisation & query tuning
Cloud & DevOps	Google Cloud (Maps, Calendar, Gmail, OAuth), Microsoft Azure, AWS, Docker, CI/CD, Nginx/Apache
Mobile	React Native (iOS & Android), Flutter integration, IoT device communication

PROFESSIONAL EXPERIENCE

Software Developer • **Cyrus Technology**

2024 – Present
Nasr City, Cairo

- › Contributed to large-scale enterprise CRM, ERP, RMS, and B2B solutions sold to external clients, ensuring stability and scalability.
- › Focused on presenting complex system data in a smooth, user-friendly manner across both backend and frontend layers.
- › Enhanced business analysis skills through company-provided accounting and process lessons, translating client needs into technical requirements.
- › Developed a product-mindset approach: thinking about how each contribution adds value to the company, not just completing isolated tasks.

Full-Stack Developer • **United Media Services (via Clicks Egypt)**

2022 – 2024
Remote

- › Worked on sensitive, time-critical projects for one of Egypt's largest media and governmental entities.
- › Delivered UMA (e-learning platform), UMS Podcast (news & podcast portal), and the Al-Alamein Festival Event Management System on strict deadlines.
- › Operated as a full-stack developer covering backend, frontend, and occasional data-management responsibilities.
- › Strengthened ability to perform under pressure, adapt to sudden changes, and ship mission-critical systems reliably.

Full-Stack Developer • **Cross Care — Freelance (Australia)**

09/2022 – 05/2023
Remote

- › Built 'On My Way Therapy', a therapy-services platform, handling backend, frontend, and project-management duties.
- › Ensured compliance with Australian NDIS (National Disability Insurance Scheme) accessibility standards.
- › Collaborated with an international remote team, overcoming language and cultural barriers effectively.
- › The platform was later featured on Shark Tank Australia and successfully attracted investors.

KEY PROJECTS

Real Estate CRM SaaS — DealSpace (United States) – Freelance 01/2025 – 08/2025

- › Designed a multi-tenant SaaS platform to centralise leads from landing pages, websites, social campaigns, and third-party APIs into one dashboard.
- › Implemented automated follow-up workflows, reminders, and scheduling features to optimise lead conversion for sales teams.
- › Built reporting & analytics dashboards covering sales performance, team efficiency, and pipeline health.
- › Integrated Google Maps API, Google Calendar API, email automation, Microsoft Azure, and Google Cloud for infrastructure.

Event Management System — AI-Alamein Festival (via Clicks Egypt / UMS) 05/2024 – 07/2024

- › Developed the backend infrastructure for Egypt's largest cultural event system, managing events, schedules, attendees, and media in real time.
- › Designed RESTful APIs used by the React.js web platform and a Flutter mobile application simultaneously.
- › Built for thousands of concurrent users with a focus on performance, scalability, and reliability under live-event conditions.

E-Scooter Mobility Platform — Fentec Mobility (Algeria) – Freelance 2022 – 2023

- › Delivered a complete mobility platform covering an admin dashboard, scooter management, user accounts, payments, and zones.
- › Built and published iOS & Android apps with scooter booking, ride management, payments, and real-time location tracking.
- › Implemented Google Maps geofencing, routing optimisation, and IoT integration for scooter hardware (unlock/lock, live status).

EDUCATION

Bachelor of Arts — English Language & Literature

Higher Institute of Languages, affiliated with October 6 University, Cairo

2019 – 2024
